

Content Creation Workshop: Leveraging GPT for Your Brand

Interactive Element: Content Creation Workshop

Description: This workshop is designed to be a practical, hands-on experience for local brand owners to leverage GPT technology in creating engaging content. Whether virtual or in-person, the workshop guides participants through the process of generating content drafts with real-time GPT assistance, focusing on optimization and creativity.

Objectives:

1. Introduce participants to GPT technology and its capabilities in content creation.
2. Facilitate real-time content generation sessions tailored to each participant's brand details, audience characteristics, and content goals.
3. Offer guidance on optimizing content for engagement, SEO, and brand alignment.
4. Encourage creativity and experimentation in using GPT for various types of content.

Workshop Agenda:

1. Introduction to GPT and Its Applications in Content Creation
 - Overview of GPT technology.
 - Examples of successful content created with GPT.
2. Setting Up for Success
 - Identifying your brand's voice and message.
 - Understanding your audience.
3. Live Demonstration: Generating Content with GPT
 - Live session where participants input their brand details into GPT.
 - Guidance on refining the outputs for practical use.

Content Creation Workshop: Leveraging GPT for Your Brand
